Education

New York Institute of Technology

Old Westbury, NY

Bachelor of Computer Science Concentration in AI | GPA: 3.91

Expected Graduation: Dec 2026

- **Courses:** Data Structures, Design and Analysis of Algorithms, Operating Systems, Theory of Computation, Computer Networks, Database Management, Artificial Intelligence, Software Engineering

Work Experience

Avanti Jewels E-commerce Website

Hicksville, NY

Front-End Web Developer (Freelance) | Live Site | Source Code

December 2025 – January 2026

- Fully Developed a responsive e-commerce platform using JavaScript, Css, and Html with 10+ product category pages using pure fronted technologies, featuring a 3-column product grid with filtering, sorting, and pagination
- Implemented a dual theme system with localStorage persistence, interactive image galleries with lightbox functionality, and published website with custom domain configuration (DNS, A records)
- Engineered mobile-first responsive design with touch-optimized UI, horizontal scrolling on mobile, and performance optimizations for fast loading across all devices
- Used GitHub Copilot and Claud to accelerate debugging, refactoring, and JavaScript logic implementation

Signature Smile Dental

Bristol, PA

Technical Mentorship Clinical Systems & Workflow

December 2022 – March 2023

- Analyzed digital patient management infrastructure including electronic health records (EHR) database, appointment scheduling system, and digital radiography (X-ray) imaging software integration
- Observed practice management software workflows for patient charting and treatment planning, reviewing approximately 8-10 patient charts per session across 60+ hours of clinical mentorship
- Documented end-to-end clinical data flow from patient intake through treatment completion, including digital record-keeping, insurance processing, and automated follow-up scheduling protocols

Projects

Lumen Finance | Source Code

React Native, Expo, Supabase

- Built a full-stack mobile finance app with secure authentication, transaction management, budget tracking, and savings goals using React Native, Expo, and Supabase with Row Level Security
- Integrated AI-powered financial insights via Groq's Llama 3.3 70B model using Supabase Edge Functions, delivering personalized spending recommendations based on user transaction data
- Developed interactive analytics dashboards with period-based bar charts (Week, Month, 6 Month, Year) and category spending breakdowns using TypeScript and NativeWind

Database Management System | Source Code

Java, JavaFX

- Led development of a multi-DBMS management application supporting PostgreSQL, MySQL, and Oracle databases with full CRUD operations, adopted by NYIT's Entrepreneurship Center for student database instruction
- Architected full-stack solution with JavaFX frontend and JDBC connectivity, reducing SQL query learning curve by eliminating the need for deep syntax knowledge across three database platforms
- Improved database management efficiency by 40% through unified table-level and row/column operations interface, enabling non-expert users to perform complex data manipulations without writing raw SQL

Certifications

Cisco IT Essentials

June 2021

- OS configuration (Windows, macOS, Linux), hardware repair and maintenance, component installation

ServiceNow Fundamentals (Self-Directed)

2025

- Explored incident management, workflow automation, and IT service management (ITSM) concepts

LinkedIn Learning: AI Pair Programming (In Progress)

2025

- GitHub Copilot for accelerated development and debugging workflows

Technical Skills

Languages: Java, Python, C++, JavaScript, TypeScript, HTML, CSS

Frontend: React Native, Expo, Expo Router, NativeWind, Tailwind CSS

Backend & DB: Supabase, PostgreSQL, MySQL, OracleDB, RLS

AI & Tools: GitHub Copilot, ChatGPT, Deepseek, Groq API, Llama 3.3 70B, Deno

Environments & OS: Windows, Linux (Ubuntu), macOS, VirtualBox, Bash, SSH

Cloud & DevOps (Learning): Docker, AWS (EC2/S3 — fundamentals), MFA protocols

Networking: TCP/IP, DNS (A/Quad records), HTTP/HTTPS

Collaboration: Slack, Zoom, Microsoft Teams, GitHub Projects, Git
